

Question 1: What is Newton's Second Law of Motion?

Answer Key: A

Subject: Physics | Chapter: Mechanics | Difficulty: easy | Tags: physics, mechanics

Explanation: Newton's second law states that acceleration of an object depends on force and mass: $F = ma$

Question 2: What is the acceleration due to gravity on Earth's surface?

Answer Key: A

Subject: Physics | Chapter: Gravitation | Difficulty: easy | Tags: gravity, physics

Explanation: Earth's standard gravitational acceleration at sea level is approximately 9.80665 m/s^2 .
